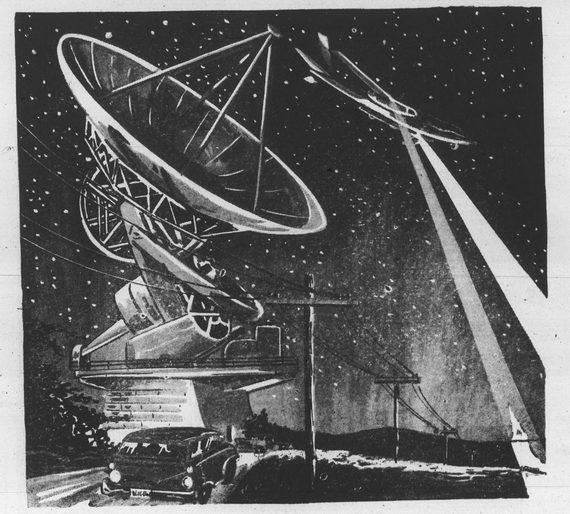
SECURITY!



Security is the watchword in this half of the 20th Century. It is the foundation for both happiness and progress.

Years ago, Security was represented by a wall around an area. Then a ditch of water was added, called a moat, to create a fortress.

Today, Security is a many-sided quantity. Since the many continents have become One World, Security today is even more important than it was in earlier centuries. Points half way around the world are only hours away, and by some methods, only minutes away.

In Government, the Security in this country has as its foundation the three basic charters of freedom—the Declaration of Independence, the Constitution of the United States, and the Bill of Rights.

In the Military, the Pentagon in Washington represents the approaches to this type of security.

Individuals, like you and I, see honest leadership and active support of such leadership as the real, true basis for Security, especially in the last half of this Century.

In this, each one of us, individuals and groups, such as the members of this rural electric system, has a part to play. The Government cannot stand alone. The Military cannot do it alone. We must share together the responsibility of supporting the elements of the many-sided qualities of Security.

In this each of us has a part, and from this result each of us recognizes the achievement of the Security we need for happiness and prosperity.
